

Japan Association of Healthcare Management Consultants

Supporting the Fundamentals of Healthcare

The Japan Association of Healthcare Management Consultants supports the social and public nature of healthcare from the aspect of management.

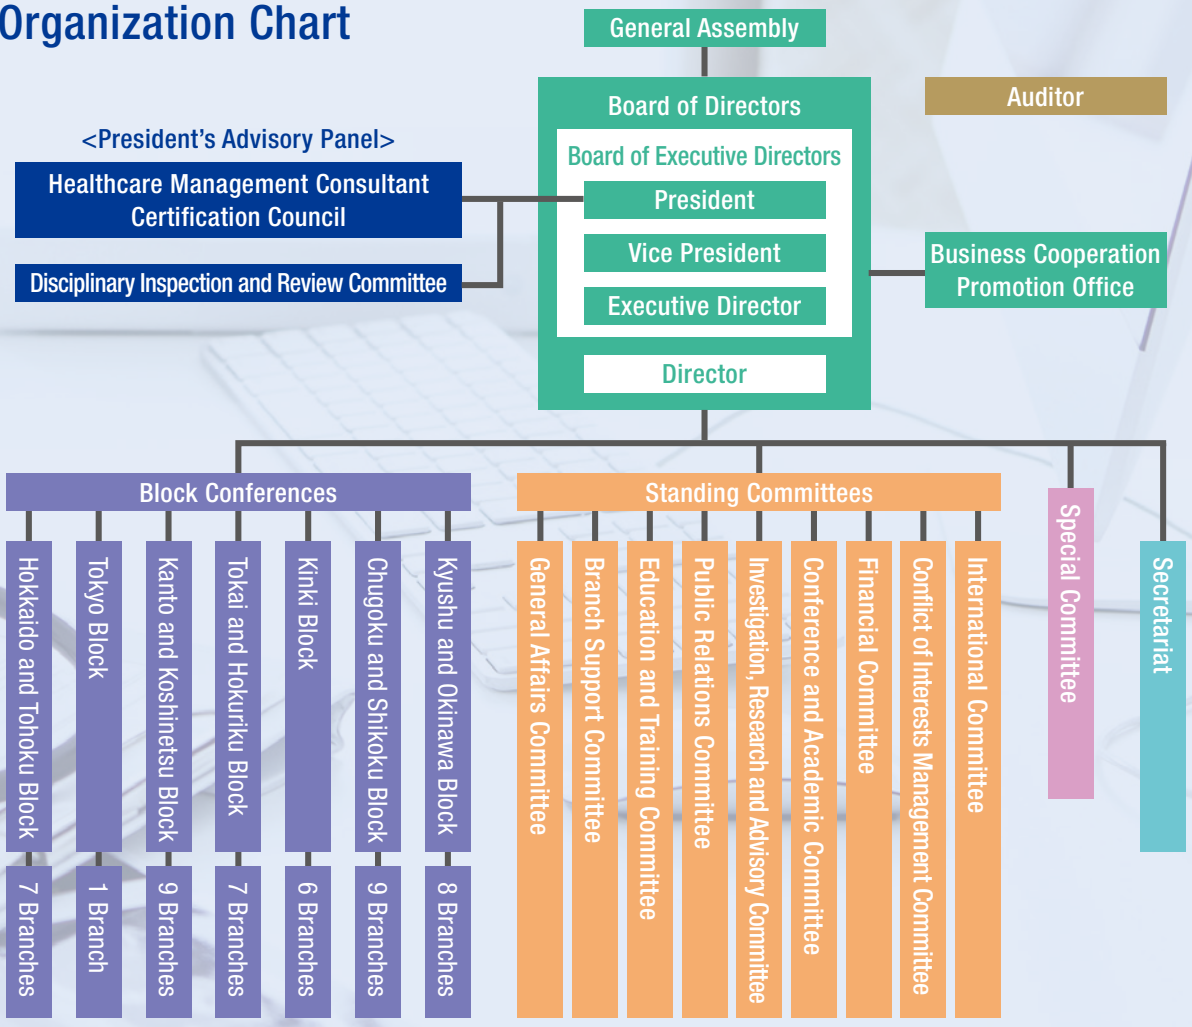

We train Certified Healthcare Management Consultants; qualified professionals who mainly support healthcare from the aspect of management.

We confer this qualification to persons who meet the set requirements for conducting work entailing such elements related to healthcare management for consignees as analyzing current conditions, making proposals for improvement, implementing support, and conducting advisory activities. We are the largest organization in Japan of consultants specializing in healthcare management.

We systematically implement accreditation and human resources development, while also securing qualification standards and improving abilities, providing support activities for ensuring the consolidation and stabilization of healthcare management in Japan's medical institutions.

Organization Chart

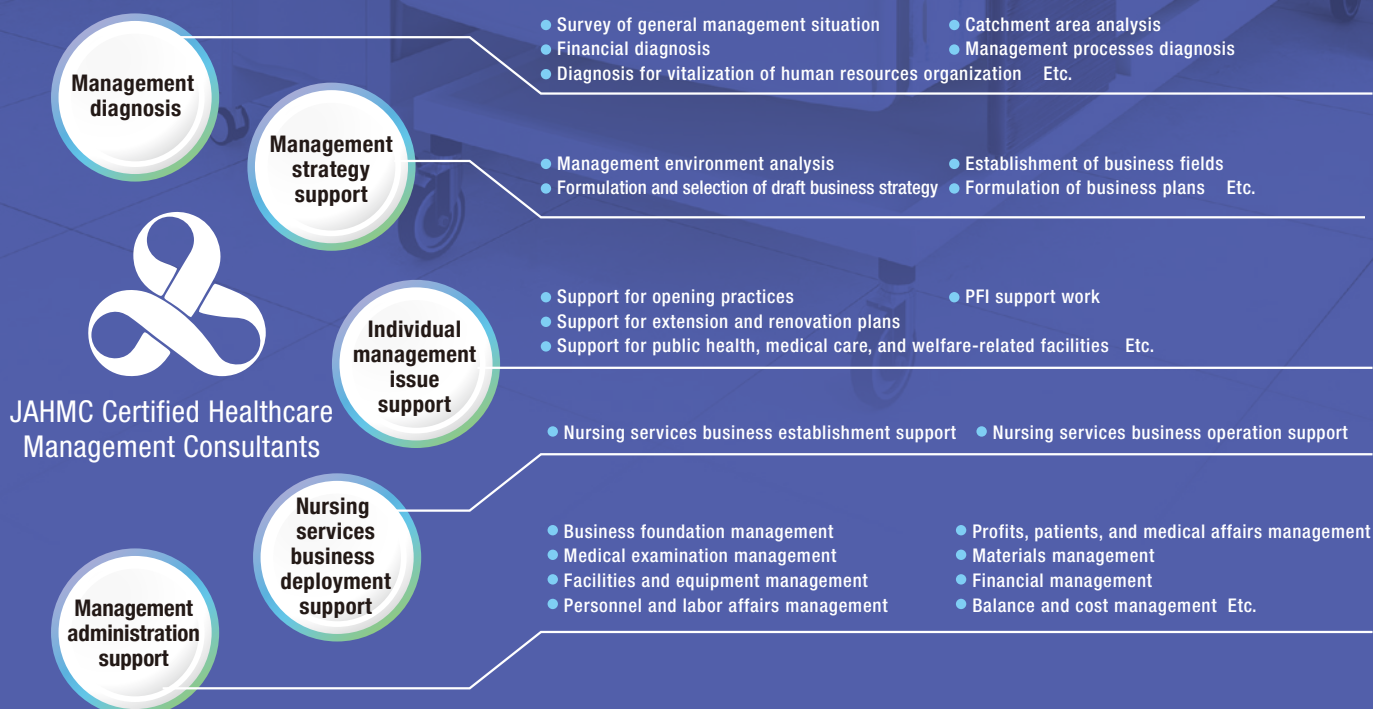

JAHMC Certified Healthcare Management Consultants are professionals who resolve various management issues as healthcare management partners.

Who are Healthcare Management Consultants?

Healthcare Management Consultants qualified by JAHMC contribute to realizing effective and efficient healthcare management, by counseling, assisting, advising, etc. on the basis of making the best use of JAHMC systems for enabling cooperation and collaboration as a professional. Our consultants complies with the laws and regulations relating to healthcare institutions and management as the foundation of the provision of medical care, nursing care, and welfare, for the purpose of the improvement and enhancement of social welfare, social security, and public health, allowing all citizens to achieve the benefits the right to lead healthy and cultural lives.

JAHMC Certified Healthcare Management Consultants constantly strive to enhance their professional capacity for resolving healthcare management issues in a changing society. As one aspect of this, they take prescribed training for a specified length of time per registered period even after achieving qualification. The mission of our consultants is to contribute to the development of medical care, public health, nursing care, welfare, and society by proposing and supporting the implementation of effective measures for management issues, alongside the creation of opportunities in healthcare institutions.
